Inorganic Waste Treatment (Universitas Islam Negeri Walisongo Semarang, Indonesia)

Description:

Inorganic waste is managed by cleaning staff of UIN Walisongo Semarang. Inorganic waste is collected at the place everyday. The management of inorganic waste at UIN walisongo have a purpose to increase the economic value itself or turn it into a material that does not have any hazard to the environment. Now the recycling of inorganic waste is still 25% handled by the management. Managed inorganic waste is made into various kinds of handicraft that products by Biology students of UIN Walisongo Semarang. In the future 50% of inorganic waste will be managed in the campus as an ecobricks program which is now being developed by the environmental study group.
